SAFETY PRODUCTS

## GUARDIAN™ Barrier Curtain

- Barrier curtain provides safety from weld flash, flying debris and entry into cell area
- Proven high cycle design eliminates downtime and maintenance
- Soft-bottom edge™ design protects personnel and property
- Interconnect with controller automates your robotic process
- Clear vision panel available for non-welding applications
- Optional control box provides reliable monitoring

## VERTI-GUARD™ Hard Panel

- Unique bottom-up operation in a hard panel design
- Ideal for overhead crane loading with no header to get in the way
- Clear vision or black panels available
- Low side profile and available toe space require minimal reach-in
- Resistant to tears, cuts or punctures

## SLIDE-AIR™ Curtain

- Pneumatic sliding curtain helps eliminate weld flash and eye injuries
- Fully adaptable to your level of automation, with several control options
- High-speed operation is ideal for robotic work cells
- Pleated curtain design requires minimal open storage space
- Heavy-duty construction and reliable pneumatics assure low maintenance
- Opaque or translucent curtain options
